Ollie's Cape Scooter Garment
 designed by Pam

Materials:

- Rip stop nylon (light to medium weight) rectangle 23" x 23"
- Fleece rectangle 19" x 19"
- Waterproof pillow cover or mattress pad rectangle 19" x 19"
- 1 package 3/4- 1" wide non-roll woven elastic (36 inches, cut in half into two 18" pieces)
- 2 Fashion-Fit clips - from the sewing notions aisle
- Thread

1. Layer ripstop nylon on bottom and center the waterproof material over that with the fleece on top of the waterproof barrier, making it a 3 layer stack of fabric. *Fig. 1*
2. Fold each edge of ripstop over twice, until the ripstop wraps over the other two fabrics evenly making a clean seam around the edge. *Fig 2*
3. Sew on the double fold all around the cape.
4. Attach each 18" length of elastic, crossing about 2 inches from where it attaches to the cape in the front and back. Sew at elastic crosses. Front and back views of the garment straps are the same.
5. Use Fashion-Fit Clips on the chest side and back side to keep the straps from slipping down over the shoulders. This size is for a standard doxie, sizes may have to be adjusted to your dog. Hope this helps!

OPTIONALLY

Attach the rectangular cape to one of your existing harness. Check with an upholstery shop or for a sewist at your local fabric shop if you do not sew.
