Step 5:

Unfold and put on your dog. If the cuff is too tight on the neck, take the sleeve off the dog and cut the cuff open a little bit (as shown with the dotted line).

Step 3:

To prepare for cutting the leg holes, fold sleeve nearly in half, leaving about an inch or so above the bottom fold of the sleeve (as shown with dotted line).

Step 4:

Determine where the leg hole should be by holding the sleeve next to your dog. There's no need to be precise because the sleeve will stretch as the dog moves around. Cut a 2 - 3 inch long by 1/2 - 1 inch high rounded half rectangle along the folded edge.
